Dear Rob

US Patent Application No 10/543,017
For 'Assay for Detecting Methylation Changes in Nucleic Acids using an Intercalating Nucleic Acid'

Thank you, we received all of the pages that you sent through by fax.

We have forwarded the partially executed Declaration, Assignment and Power of Attorney (not signed by George Miklos) for the above application to our US associate. For US purposes, the assignment document must refer to the US national phase application, therefore, our associate needs to file the specific US assignment executed by all of the inventors. Please have George Miklos sign the documents for this application and return them to us by fax or email as soon as possible. Please also forward the original documents for us to forward to our US associate. As the deadline for filing these documents is 23 April 2006, we have asked our associate to request a one month extension of time to 23 May 2006.

We look forward to hearing from you.
